

430cm 530cm Fishing Tackle Set Long Casting Ultralight Telescopic Fishing Rod ISO

Our Product Introduction

Basic Information

- Place of Origin: Shandong, China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: 301
- Minimum Order Quantity: 500 Pieces
- Price: 29 USD/Piece
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 20000 Pieces/Month

Product Specification

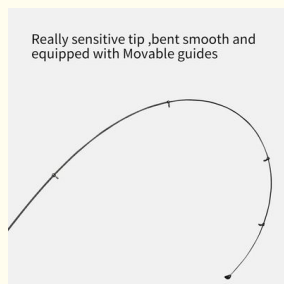

- Product Name: ISO Fishing Rod
- Material: Carbon
- Top Diameter: 0.68mm
- Hardness: Soft
- Position: STREAM, River, Lake, Ocean Rock Fshing
- Category: Telescopic Fishing Rod, Lure Rod, ISO Rod
- Fishing Rods Type: Spinning Rods, Telescopic Rod
- OEM: Acceptable OEM Fishing Rod
- Highlight: 530cm Fishing Tackle Set,
430cm Ultralight Telescopic Fishing Rod,
430cm Telescopic Fishing Rod ISO

Packaging and Delivery

Selling Units:	Single item
Single package size:	120X6X6 cm
Single gross weight:	3.000 kg

Jupiter designed for ISO rod ,Smooth rings support the Long casting and smooth line out

A telescopic ISO fishing rod is a specialized fishing rod designed for anglers who practice ISO fishing, a technique that originated in Japan and is commonly used for saltwater and freshwater fishing. ISO fishing, also known as Isome or Isome fishing, often targets a variety of species, including sea bream, flounder, and other bottom-dwelling or reef-associated fish. The telescopic ISO fishing rod is designed to meet the specific needs of this fishing style. Here are some key features and considerations:

Telescopic Design: Like other telescopic fishing rods, an ISO fishing rod has a collapsible design, which makes it highly portable and convenient for anglers who need to travel to their fishing spots. The telescopic design allows the rod to extend to its full length for fishing and collapse to a compact size for storage and transportation.

Length: ISO fishing rods come in various lengths, typically ranging from 2 to 5 meters (approximately 6.5 to 16.5 feet). The choice of length depends on your fishing location, target species, and personal preferences.

Material: ISO fishing rods are often made of lightweight and durable materials, such as carbon fiber or a composite of carbon fiber and other materials. These materials provide the necessary strength and sensitivity for ISO fishing.

Action and Power: ISO rods are designed with specific actions (e.g., fast, medium) and powers (e.g., light, medium) to suit the fishing conditions and the size of the fish you intend to catch. The choice of action and power depends on your target species and the type of bait or lures you plan to use.

Line Weight and Lure Rating: Pay attention to the manufacturer's recommendations for line weight and lure rating to ensure that your rod is compatible with the fishing line and lures you intend to use.

Reel Seat: The reel seat on an ISO fishing rod should be compatible with the type of reel you plan to use, whether it's a spinning reel or another type suitable for ISO fishing.

Guides: High-quality guides with smooth inserts are essential for casting and retrieving lines smoothly. Look for guides that are resistant to corrosion, as ISO fishing often involves exposure to saltwater environments.

Handle: The handle of an ISO fishing rod may be designed for comfort and grip. Handles can be made of materials like cork, EVA foam, or rubber for a secure and comfortable hold.

Sensitivity: ISO fishing requires a high level of sensitivity to detect subtle bites. The rod should have a sensitive tip section that allows you to feel even the slightest movements from the fish.

Price: ISO fishing rods come in a range of prices, so consider your budget and fishing requirements when selecting one.

ISO fishing is known for its finesse and technique, and having the right rod is crucial for success. A telescopic ISO fishing rod can be a valuable tool for anglers who enjoy this style of fishing and need a portable and versatile rod for their adventures.
